INFORMATIONAL REFERENCE DOCUMENT

Firm Overview

A concise summary of Poros Global Enterprises, its holding-company structure, and its strategic domains.

Who We Are

Poros Global Enterprises is a private holding company focused on ownership, capital allocation, governance, acquisitions, technology development, and long-term value creation across multiple industries.

Established in 2024, Poros Global Enterprises was designed to provide a permanent ownership structure capable of supporting businesses, operating platforms, intellectual property, strategic investments, and emerging technologies across a diversified portfolio.

The organization operates as a parent holding company, allocating capital and strategic resources across a defined set of domains, and supporting operating platforms positioned within those domains.

Poros Global Enterprises believes durable value is created through disciplined ownership, responsible capital allocation, strong governance, and long-term thinking.

We seek to build, acquire, and support businesses capable of compounding value across economic cycles while maintaining operational flexibility and strategic independence.

Operating Principles

Poros Global Enterprises is guided by a consistent set of ownership and capital allocation principles, applied across every domain and operating platform within the organization.

PRINCIPLE 01 Durability A preference for businesses and assets capable of withstanding economic cycles while maintaining consistent operational resilience.	PRINCIPLE 02 Governance Every platform and initiative operates within frameworks that reinforce accountability, transparency, and long-term discipline.
PRINCIPLE 03 Scalability A focus on systemic, repeatable growth capacity built on sound infrastructure rather than speculation.	PRINCIPLE 04 Convertibility Capital and ownership structures are built with flexibility in mind, supporting long-term strategic optionality.

These principles inform how Poros Global Enterprises evaluates ownership, structures capital, and supports the long-term development of its operating platforms.

Strategic Domains

Poros Global Enterprises allocates capital and strategic resources across eight strategic domains. Each domain represents a long-term strategic allocation mandate — an area in which Poros may invest, develop, acquire, or support businesses and operating platforms.

- 01 Finance
- 02 Technology
- 03 Insurance
- 04 Real Estate
- 05 Energy
- 06 Logistics
- 07 Raw Materials
- 08 Pharmaceuticals

A complete reference of the strategic domains and named operating platforms positioned within them is available in the *Domains & Subsidiaries One-Pager*, available as a separate download.
